John,

Here is the info on the Wilcox lead issue.

Subject: Wilcox lead question, how much lead is there?

Jeff:

I will like if you could take this map or figure (see enclosed) and where it identifies with rectangles the "Source No. 3", "Source No. 7" etc., draw some additional new rectangles to show the lead concentrations that correspond to samples on those sources.

What lead concentrations? The ones shown on the enclosed table.

The Pb 513, Pb 164, Pb 0.10 etc., etc., etc.

Is this doable? This is to help our EPA Removal OSC.

An alternative is to place a 5 column table on the top of the figure with some of the sampling information. (Source, lead, sample, date and Depth)

Mark, this is what I found about lead in Wilcox and how much is there.

The highest was in Source No. 3, the area we visited and where there were some oily stuff on the ground, probably from the tank bottoms of when there was a tank farm there.
